

Amberline

Uncoated – Eucalypt Core

An attractive and budget friendly interior lining solution, ideal for offices, lounges and commercial spaces to rumpus rooms and garages.

The Redwood faces have a warm reddish-brown colour with a straight grain. The veneer is pressed onto a Poplar core, giving it a clean, tidy look. As a BC-grade panel, it offers a neat front face with a practical back for general interior use.

Amberline

Uncoated – Eucalypt Core

DESCRIPTION

Amberline Uncoated is an untreated, non-structural plywood panel designed for use as a decorative interior wall or ceiling lining in dry environments. It is suitable wherever an untreated timber product is permitted when specified in accordance with NZS 3602:2003 – Timber and Wood-Based Products for Use in Building.

Amberline is also manufactured as an alternative solution plywood panel and can be used as part of a wall bracing system for timber-framed buildings in accordance with NZS 3604:2011. For further bracing information, please refer to the Bracing Guide.

Some degree of variation in colour, grain, and overall appearance is inherent to engineered wood products, and differences between panels should be expected. Always inspect all plywood panels prior to installation to ensure they meet the desired aesthetic.

FEATURES

- Lightweight Poplar core
- Smooth BC Redwood veneer faces add warmth and texture with their reddish-brown colour and varying grain patterns
- Available unfinished or pre-finished with Matt UV clear coating

BENEFITS

- Cost-effective – no stopping or sanding required
- Pre-sanded faces take stain, polyurethane, oil and paint well
- Light weight and easy to install
- Strong enough to hang shelving, tools and bicycles
- Takes everyday knocks well

DIMENSIONS – UNCOATED

Sheet Size	Thickness
2400 x 1200 mm	4, 6, 9, 12, 18 mm
2700 x 1200 mm	9 mm

Amberline 9mm and 12mm have been tested for bracing using the P21 method by Scion Research New Zealand.
