

Cabinet HPL

Carcass Construction

Designed for carcass construction, this panel features a High-Pressure Laminate (HPL) surface pressed on both sides of a strong eucalypt core.

Cabinet HPL is built with a durable Eucalypt core and finished with a High Pressure Laminate surface, designed specifically for non-structural cabinetry and joinery applications. Ideal for kitchens, motorhomes, bathrooms, laundries, and general interior fit-outs, Cabinet HPL provides excellent scratch resistance and withstands common household chemicals, ensuring long-lasting performance.

Cabinet HPL

Carcass Construction

FEATURES
