

SkapeBirch

Rubberwood Core

Made from Rotary Birch AB Grade veneer pressed onto a Rubberwood plywood core, Skape Birch offers a perfect blend of durability, visual appeal, and sustainability.

Rotary Birch AB Grade panels feature a creamy white to biscuit coloured birch face with a straight grain and fine texture. The pre-sanded faces are ready for finishing, and the Clear Coated option is ready to install. Made from repurposed material, they're ideal for interior wall and ceiling linings, joinery and cabinetry.

PERFORMANCE

CARB EPA TSCA certificate

ISO 9001:2015

FSC certified

Skape Birch

Rubberwood Core

Rubberwood Core: A sustainable material sourced from rubber trees once their latex production cycle ends. Rather than going to waste, these trees are harvested for furniture and other products, supporting environmental conservation. Known for its strength and durability, rubberwood is a popular choice for interior linings, cabinetry and joinery.

FEATURES

- Available uncoated and UV clear coated
- Rotary Birch AB Grade face veneers
- Rubberwood core
- Colour can range from creamy white to biscuit
- Straight grain and fine texture

BENEFITS

- UV clear coated – ready for installation
